

Bi-LSTM plots

Until 08/19

Student: Vu Anh Le

PI: Haruko Murakami Wainwright

Shortcuts

- [Current LSTM Trial](#)

Parameters settings

Sequence Length: Length of input sequence = 10 by default

Model Architecture:

- Bidirectional LSTM Layer 1: 64 units
- Dropout Layer 1: 20%
- Bidirectional LSTM Layer 2: 64 units
- Dropout Layer 2: 20% dropout
- Dense Layer: 1 unit

Optimizer: Adam Optimizer with a learning rate of 0.001

Training Settings:

- Epochs: The model trains for up to 200 epochs
- Batch Size: 32 samples per batch
- Validation Split: 20% of the training data

Time Interval for Testing Set: The testing set includes data from the last **4 years** before the most recent data point
